## ABOUT ME

---

I'm a passionate Full Stack Web Developer with a strong focus on frontend development. I specialize in leveraging the JavaScript ecosystem to create intuitive user interfaces and the robust APIs that bring them to life. Committed to continuous learning and professional growth, I thrive on delivering high-quality solutions and staying ahead in the ever-changing world of web development.

- SQL
- Git

## WORK SUMMARY

---

### SOFTWARE DEVELOPER / TEAM LEAD

Borderpass [ Toronto, Canada ] | 2023 - Present

BorderPass is a fast-growing legal tech startup dedicated to simplifying the visa journey for international students in Canada through innovative technology solutions.

#### *Accomplishments:*

- Leading the revamp of application processing streams, overhauling both the UI and underlying business logic to deliver a more intuitive and efficient user experience
- Spearheaded the development of the Permanent Residency flow, enabling users to input personal data, securely store it, and process payments seamlessly using Stripe.
- Contributed to the seamless integration of GoodData, ensuring stakeholders could access comprehensive analytics and insights effortlessly.

As a full-stack developer, I have been contributing equally to both frontend and backend development, leveraging a diverse technology stack, including TypeScript, React, NodeJS, GraphQL, Jest, Sequelize, and AWS.

## FULLSTACK DEVELOPER

Hölmetrics [ Toronto, Canada ] | 2021 - 2023

Hölmetrics is a data-analytics company that provides enterprise-level employee experience and organizational performance analysis. The company enables leaders to make real-time data-informed decisions, driving both employee satisfaction and business performance.

*Accomplishments:*

- Led the development of action plans, a feature enabling clients to generate complex data visualizations using HR data and derive actionable insights. This included building the frontend interface and developing backend APIs to store and process collected information.
- Developed advanced interactive data visualizations using Highcharts, empowering clients to easily analyze and understand their organizational data.
- Collaborated with management and the data science team to shape and deliver a robust web application tailored to early-stage startup needs.

As a full-stack developer with a primary focus on frontend development, I utilized a modern technology stack, including TypeScript, JavaScript, React, Redux, Node.js, Express, TailwindCSS, Highcharts, AWS, and MySQL. I was responsible for the full development lifecycle, including UI creation, backend API development, and deployment. Additionally, I used AWS to maintain and manage the application's infrastructure, ensuring stability and scalability

## FRONTEND DEVELOPER

ICL Services [Kazan, Russia] | 2020 - 2021

ICL Services is a leading project-based outsourcing company in Russia, providing IT solutions to a diverse range of industries. Known for its expertise and innovation, the company serves as a trusted partner to businesses across the region.

*Accomplishments:*

- Delivered the frontend for an administrative dashboard, enabling efficient handling of client interactions such as submitting claims, complaints, and real-time chat. Built the system from scratch, ensuring a user-friendly and functional design.
- Developed a seamless customer flow for processing client inquiries, collaborating closely with business analysts and backend engineers to align technical
- Leveraged modern frontend technologies to design and implement responsive webpages based on Figma prototypes, incorporating Material-UI for consistency and aesthetic appeal.

As the sole frontend developer on this project, I played a pivotal role in delivering a high-quality product using React, TypeScript, Redux and Material UI. Working within an Agile team and following Scrum principles, I ensured timely delivery and smooth integration with backend services, showcasing my ability to work independently while aligning with cross-functional teams.

## ACADEMIC BACKGROUND

---
